RESPONSE TO RESTRICTION REQUIREMENT

Commissioner for Patents:

In response to the Restriction Requirement dated January 29, 2004, Applicants hereby elect, with partial traverse for reasons elaborated below, Group I, claims 1-11 and 26, directed to isolated nucleic acid molecules, vectors, and host cells comprising these nucleic acid molecules, for examination at this time. Further to the sequence election requirement, Applicants elect, with traverse, the nucleotide sequence set forth in SEQ ID NO: 4 for examination at this time. Applicants reserve the right to pursue, without prejudice, the subject matter of the non-elected groups in a subsequent divisional, continuation, or continuation-in-part application. Consideration of the Remarks submitted herewith and of the elected claims is now requested.

#### REMARKS

Applicants respectfully request that Group X, claim 27, be rejoined with elected Group I for examination at this time. Group I is directed to isolated nucleic acid molecules (*e.g.*, SEQ ID NOS:1, 3, and 4), vectors, and host cells comprising these nucleic acid molecules, and claim 27 is directed in pertinent part to a composition comprising an antisense oligonucleotide capable of hybridizing to SEQ ID NO:1, 3, or 4. Applicants respectfully submit that concurrent examination of the subject matter of claim 27 with that of claims 1-11 and 26 in the present application would not create a serious burden on the Examiner. Specifically, Applicants submit that no undue search burden would arise were claim 27 to be rejoined to Group I because a search for the claimed nucleic acid molecules encoding an ABCA5 polypeptide would be expected also to yield any references, should they exist, having relevance to complementary, antisense sequences.

Applicants also respectfully traverse the requirement to elect a single nucleic acid sequence. The nucleic acid molecules having the nucleotide sequences set forth in SEQ ID NOs: 1, 3, and 4 are related sequences. Specifically, the nucleic acid molecule comprising the nucleotide sequence set forth in SEQ ID NO:4 encodes an ABCA5 polypeptide comprising the sequence set forth in SEQ ID NO:5 (*see, e.g.*, specification, page 14, lines 14-22). The nucleotide sequence set forth in SEQ ID NO:3 represents the coding region, nucleotides 114-5030, of SEQ ID NO:1; therefore, both SEQ ID NO:1 and SEQ ID NO:3 encode the ABCA5 polypeptide having the sequence set forth in SEQ ID NO:2 (*see, e.g.*, specification, page 9, lines 17-21; page 14, lines 14-22; page 16, lines 10-19). Applicants therefore respectfully submit that the search burden is neither high nor undue for examining these related sequences because a search for the nucleotide sequence set forth in SEQ ID NO:4 would be expected also to yield any references, should they exist, having relevance to SEQ ID NO:1 or SEQ ID NO:3.

Application No. 10/090,458  
Reply to Restriction Requirement dated January 29, 2004

Accordingly, Applicants elect SEQ ID NO:4 solely for purposes of responding to the Restriction Requirement, and respectfully request that this further requirement for election of a single sequence be reconsidered in the context of the teachings of the present application. Consideration of the present Remarks and the elected claims is now requested.

Respectfully submitted,  
Seed Intellectual Property Law Group PLLC
